

## Bone Graft Post-Op Instructions

1. Bite on gauze for approximately 1 hour. Extra gauze is provided. Use as needed.
2. **DO NOT** drink hot liquids, use a straw, or smoke for five days.
3. Begin rinsing the mouth with the prescribed mouth wash the day following the procedure. (NO swishing)
4. Recommendations for pain control (Your pain and swelling will usually increase for the first 3 days before gradually improving)
  - a. Take Ibuprofen 600 mg as soon as you get home and then every 6 hours for 2-3 days
  - b. Take Tylenol (Acetaminophen) 500 mg 3 hours after you get home and then every 6 hours for 2-3 days
  - c. Take Hydrocodone/Acetaminophen (Prescription pain medicine) every 6 hours as needed for breakthrough pain
5. If sutures were placed, they will dissolve usually within the first 1-2 weeks.
6. Eat a **soft diet** for at least 2 weeks, and chew on the opposite side (See back page for food suggestions). Dr. Streelman will give you further instructions at your follow-up appointment.
7. In case of an emergency, please call our office at (206) 690-5417. This number is also available to reach Dr. Streelman after hours.

If you have any questions, please contact our office.

Good Luck! You will do great!
